

no hardship

I've been listening to people telling me my life's real fine
while all I did was to refine my mind
I've been told I was a lucky one
but chance is not a virtue I enhance

I've been listening to people think that course I am tanned
I must be lazy and got too much time to spend
but that I do my work in the sun
is my own choice 'course it's more fun

Instead I profit of a single thought
I keep an open mind
and only let what's light on board

It's not hardship
what makes a life to seem light
and it takes more than make-believe
to know that a sunny day is bright
and all you need to do is blink
your beautiful eyes to see that
everything is right here on time

I've been listening to people think my way is way too light
and that a smile must come easy to my mind
but that it works the other way around
is what this song is all about

give up your believe of you
having to work hard to have a good time
and instead have a good time
and our work wont be no hard

It's not hardship
