

come with me

this is usually the time where I change my mind
I can't say why but I like to change my mind and run away
I was never very good in sticking to one thing for too long
course I like to change my mind and run away

so since days I can see the feeling growing inside
it's come to change my mind and make me run away
funny thing though is that I'm with you now
so I don't really want to change my mind
I don't wanna run away

would you come with me
baby, would you come with me
would you change your life and run away
now, would you come with me
and change your life for me
baby would you run away to be free
then come with me
baby, come with me

from one day to another I have turned around so many times
I just changed my life and ran away
from one day to another you have turned around many times
did you change your life or did you run away

now that I asked you if you change your life
you said you change your life to run away

would you come with me
baby, would you come with me
would you change your life and run away
now, would you come with me
and change your life for me
baby would you run away to be free
then come with me
baby, come with me
